***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Amended claim 1 is now rejected as being unpatentable over Ando [105] for the same reasons listed in the previous rejections to claims 1 and 4 in the last office action.

In addition, claims 3,7-12,16-21,25,28 are rejected for the same reasons as stated in previous office action.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,13,14,22,23 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Ando [105] in view of Nakasugi [211] for the same reasons as stated in previous office action.

### ***Response to Arguments***

Applicant's arguments filed May 14, 2001 have been fully considered but they are not persuasive. In response to applicant's argument that the Ando [105] reference does not point toward positioning the individual beams on the substrate as needed with a write process by means of the deflectors, the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

In response to the applicant's argument that concerning the object plate and its function the examiner points out the fact that apparatus as a whole in Ando [105] also splits the beam into multiple sub-beams that are imaged on the target thus achieving the same function as what applicant claims.

In response to the applicant's argument about the collimators in Nagaksugi [211] are used to prevent the intrusion of reflected electrons from neighboring marks, the examiner points out that the collimators are well known in the art and are also capable of performing the same function as described by applicant.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
